PACIFIC RISK Advisors

CAPABILITY STATEMENT

Pacific Risk Advisors Ltd (PRA) is a management consultancy specialising in environmental, social and governance (ESG) and sustainability risk management for the global business community.

Our aim is to enhance the overall performance and value of a company, investment or fund through managing and reducing sustainability-related risks. These risks include regulatory compliance, climate, carbon, energy, environmental, health, safety, labour, health, community aspects, operational, corporate, and reputational.

Our Advisors have extensive experience from working internationally and conducting a multitude of projects throughout the Asia Pacific region.

Our combined experience covers a wide variety of industries, sectors, and approaches, all of which call for our expertise in environmental, health, safety, and social risk aspects of the operation. We advise Senior Management, Directors, Boards and Project Managers in concise and practical ways to achieve their selected ESG goals.

ESG Advice - benchmark against international standards and practices

Leveraging our extensive experience, we provide expertise in international standards and practical understanding of local and cultural implementation alongside ESG expectations.

Our Advisors are often called upon to assess investee performance against international guidelines from the IFC, EBRD, ADB, EDFI, ILO, the Equator Principle, and similar criteria. This is often a prelude to an ultimate listing on an international stock exchange.

Our Approach

PRA provides a pro-business orientated approach to identify, manage, and mitigate ESG risks. We improve operational effectiveness and take the pressure off the senior management and executives by bridging the gaps between the sustainable, technical, and financial issues to address the current and future needs of a company.

In due diligence operations, PRA is often a key part of the advisory team ensuring that issues of a “non-tangible nature” are understood and addressed. We provide ongoing management and advice to the investee company’s board to prepare them for future growth and responding to sustainability and ESG related pressures.

Expectations of senior management, executives, fund managers, investors and stakeholders for practical advice and feasible solutions are fully understood. By providing technical services that complements our ESG advice, PRA bridges the gaps between operational and technical issues and maximising investor returns.

Our services continue over the lifespan of a company through advice and management on the sustainability risks. Our approach provides confidence to stakeholders and investors increases the growth opportunities and provides a solid framework for risk mitigation.

PRA fully recognises the need for consistent, practical, and implementable quality assurance in all its projects. PRA sees QA as of paramount importance in ensuring continuity of service. In this regard, we follow a strict regime of peer review and oversight for all outputs using internal systems that are based on the principles of ISO 9001.

PRA has been a signatory of the UN Principles for Responsible Investment (PRI) since 2009.

Benefits of Managing ESG Risks

- Enhanced company or portfolio positioning.
- Attraction of high-value international investors.
- Investment and operational alignment with stakeholder’s expectations and concerns.
- Integration with global governance and ESG trends, standards, and best practices.
- Enhanced performance evaluation via ESG metrics.
- Strengthened pre- and post-investment risk management and value creation.
- Value increase through risk management and cost control.
- Identification of opportunities, cost savings and benefits.
- Mechanism for community and stakeholder engagement.
- Increased credibility and comfort for institutional analysts and investors.
- Marketing advantage through product differentiation.
- Demonstrates proactive management by executives.

Global Coverage

PRA has extensive resources across the Asia Pacific and beyond, ensuring comprehensive coverage in key regions. Our presence spans numerous countries, including Hong Kong, Cambodia, Thailand, Singapore, Malaysia, China, Mongolia, Korea, Japan, India, Pakistan, Taiwan, Philippines, Indonesia, Vietnam, New Zealand, Australia, South Africa, Costa Rica, Peru, Georgia, Kazakhstan.

Our Association with Inogen enables a global reach, providing ESG resources in 70+ countries with 6,000+ personnel. (Inogen Alliance)

PACIFIC RISK Advisors

CAPABILITY STATEMENT

OUR CREDENTIALS

RELEVANT PROJECTS AND EXPERIENCE

Relevant Projects and Experience

We also have a wide range of risk management and technical skills within various sectors. PRA has a dedicated team of skilled, knowledgeable, and focused professionals to address the needs of our clients.

Some of the key projects PRA and its advisors have been involved in include:

Green Building and Related Building Risk Services

- Green building gap analysis strategic review for a developer, Hong Kong
- Operational risk & critical plant building risk assessments of 9 shopping centres in China
- Building risk assessment of 1 residential and 2 commercial properties in Japan as part of portfolio review
- 6 year annual assessment for warehouse portfolio, Thailand.
- Property Condition Assessments (PCA), multiple locations across Asia.

Energy and Climate

- Design
- Design and Energy review for Hotel, Shopping Mall and Office block, Hong Kong.
- Energy Review of Property Portfolio, Hong Kong.
- Energy use overview of selected HK Government buildings, Hong Kong.
- Carbon footprint of manufacturing operations, China
- GHG KPIs setting and review, multiple projects across Asia.
- Operational effectiveness and energy review of manufacturing plant, China.

Environmental Impact Assessments (EIA)

EIA's are statutory planning requirements in many countries:

- EIA gap analysis, China.
- 400 ha resort, Phu Quoc Vietnam.
- Four and five-star hotels, Bangkok, Thailand.
- Condominium, Bangkok, Thailand.
- Commercial office tower, Bangkok, Thailand.
- Resort and boutique hotels, Phuket, Thailand.
- Commercial and office premises, Bangkok, Thailand.
- Waste management facilities in Thailand and Indonesia.

E&S Due Diligence and Investor Advisory

PRA has managed and conducted numerous acquisition, divestiture and liability assessments associated with many industrial sectors for multinationals and direct investment institutions. This has also included advising the investor team on the scale of risks and potential costs for remediation:

- 6x Data Centres (Tier 4,3,2), Hong Kong, Malaysia
- Agribusiness, Vietnam, Indonesia.
- Agritech business, China.
- Agribusiness and horticulture ,China.
- Solar & Winds Farm, Thailand, Philippines.
- Port portfolio and associated infrastructure, Thailand, Philippines.
- Shipping and lighter operations, Philippines, Indonesia.
- Fibre optic cable network installations, Cambodia.
- Fast food operations (multiple sites), China, Malaysia, Thailand, Philippines.
- Coal, coke mining and manufacturing, China and India.
- Potash mining, Laos.
- Aviation, China, and Mongolia.
- Slaughterhouse and distribution, Mongolia.
- 13 power plants across Asia and UK for US energy provider.
- Power plants, Thailand.
- Divestiture of a chemical production plant, Thailand.
- Property portfolio review of EHS and critical plant and equipment, China.
- Regulatory compliance protocols for Thailand, Malaysia, Vietnam, and India
- Food and fish processing plants, Vietnam
- Soft drink production, Hong Kong, China, Nepal, Singapore, Pakistan, India, Vietnam
- Power Plant, Gap Analysis and EIA upgrade to IFC/ JBIC standards, Thailand, and China.
- Shipbuilding, China.
- Footwear manufacturing plant, China.
- Soft and hard toy manufacturing plants, China.
- Textile facilities, Philippines, Vietnam, China, Hong Kong.
- Tannery facility, China.
- Engine manufacturing plant, China
- Logistics and manufacturing facilities, Thailand, Malaysia.

RELEVANT PROJECTS AND EXPERIENCE

- 35 site assessments throughout Asia of a household product (chemical) manufacturer.
- Electronics manufacturing facilities, Japan, China, Thailand, Malaysia, Taiwan.
- Fluorescent light bulb plant, Indonesia.
- Marine operations, Singapore, and Malaysia.
- Indium extraction plant, China.
- Petrochemical plant, China.
- Battery plants, India.
- Automotive paint manufacturers in Taiwan and China.

Operational Risk, Compliance and Analysis

Compliance and operational reviews to identify areas of concern and immediate risk issues are often an initial step in identifying sustainability management needs:

- Operational risk and compliance reviews, semi-conductor manufacturing facilities, China, Taiwan, Malaysia, Singapore
- Operational risk and compliance reviews, retail facilities and commercial offices, Hong Kong
- Labour risk assessment, hydro power plants & facilities, China.
- Operational risk and compliance program, aquaculture facilities, Vietnam.
- Operational risk and compliance program, agriculture facilities, Malaysia, and Vietnam.
- Operational risk and compliance program, zoology facilities, China.
- Operational risk and compliance program, retail facilities, China.
- Operational risk and compliance program, commercial office facilities, China, and Singapore.
- Cosmetics applicator, China, Indonesia, Thailand, Malaysia.
- Operational risk and compliance program, food franchise operation, Indonesia.
- Operational risk and compliance program, food franchise operation, Philippines.
- Corporate compliance advice to a US automotive manufacturer, India, Vietnam, Thailand, and China.
- Electronic manufacturer offices & warehousing, Hong Kong.
- Automotive production plant, Taiwan.
- ESDD Assessment of a HealthTech platform (website and app) that provides teleconsultation services, medicine delivery and other related insurance services, including collaboration with hospitals and insurers, in Indonesia.
- Aluminium sheet manufacturing, Bangkok, Thailand.
- Corporate compliance audit programme of 21 closure manufacturing facilities in Japan, Thailand, Indonesia, Hong Kong, China, Malaysia, Singapore, Vietnam, and Korea.
- Confectionery manufacturers, Japan, and Indonesia.
- Tri-annual environmental compliance audits for a US semiconductor manufacturer in China, Singapore, Thailand, and Malaysia.
- Compliance protocols for automotive manufacturers in India, Vietnam, China
- Compliance assessment of a Hong Kong airline offices and airport facilities in Japan, Thailand, Singapore, and Hong Kong.
- Compliance and good management assessment at commercial office premises.
- Glass manufacturing facility in Japan.
- Compliance protocols for MNCs throughout Asia.

Healthcare

PRA has extensive experience conducting E&S assessments in the healthcare industry for investment and operational review purposes. Our assessments span a range of entities, including HealthTech Platforms, Laboratories, R&D Facilities, Pharmaceutical Manufacturing, Clinics, Hospitals, and Residential Care Facilities, located across the APAC region. Selected healthcare related projects include:

- Environmental & Social Due Diligence (ESDD) Assessment of a Health Products, Medicines & Healthcare Solutions Company, HQ in Singapore with operations in Vietnam.

- Health safety social environmental assessment operations and related planning documentation of a silver mine in Henan province in preparation for a public listing. The assets comprised 2x mines, 1x refinery, 2x tailing dams.
- Advice and development on planning for a lead-zinc mine in Guangdong. Tasks involve preparation, coordination and review of EIA assessments, soil and water conservation planning, re-habitation planning for post-mining operations and permit applications and approvals.
- Review of proposed Coal Bed Methane extraction development for potential investors.
- SRM and DD of a silver mine in China which included a review against IFC and EP II Guidelines.
- Supervision of mining EIA and soil/ water conservation planning.

Waste Management, Site Investigations, Land Contamination & Landfill Gas

Waste management experience includes landfill management and design, hazardous waste treatment, review of disposal options, landfill gas, biomass, & alternative disposal options.

PRA has also managed numerous baseline surveys and investigations, prepared Contamination Action Plans (CAPs), Contamination Assessment Reports (CARs) and Remediation Action Plans (RAPs). PRA has extensive experience in Phase II contamination investigations and hazard surveys, involving soil and groundwater sampling, analysis interpretation and documentation preparation.

- 13 Wastewater treatment facilities, China.
- 4 Municipal waste treatment facilities, China.
- Waste management strategy, horse racing stables, China.
- Review of waste treatment plant, Korea.
- Composting and wastewater treatment, China.
- EMS implementation at a waste management operator, in Thailand, and Indonesia.
- Landfill gas migration and utilization.
- Waste licensing, Thailand.
- Waste management procedures, Thailand.
- Landfill design in the UK. Contamination assessments and investigations, UK, Hong Kong, Thailand, Malaysia, Taiwan, Australia, Korea, Japan.
- Hazard assessment of ex gas works site.
- Research into improved landfill gas pumping methods.
- National assessment of landfill gas, UK .
- Monitoring clean technologies CEC.
- Landfill gas migration and hazard mitigation, Hong Kong.

- Monitoring the after-use of land reclaimed with the aid of a derelict land grant, UK.

Training

- Diversity, Equality and Inclusion
- Anti-Harassment & Bullying
- ESMS Fund implementation, multiple funds.
- EHS awareness, Mongolia, and Vietnam.
- Supply chain auditing, HK.
- EHS Training to Real Estate Managers, Shanghai.
- UNEPFI Online tutor on ESG.
- EHS Guidance Manual, Audit and Assessment Program for RE Asset Managers.
- EHS implementation training for RE PMs.
